

Anansi Craft Activity

Print the template out onto card stock.

Colour in Anansi's body, legs, abdomen and head then cut them out being sure to follow the lines. Add small cuts as indicated on the head, abdomen and either ends of the body then slide the head and abdomen on carefully.

Bend the legs up where they join the body then bend them down between a third or quarter of the way down the leg.

Your cardboard Anansi should now be ready to stand on his own eight feet.
